

 skydoor®  
Opening the world

Skydoor sliding door is recorded/registered in the database for construction products that can be used/included in the danish swan-labelled construction.

# From an idea to the finished product

Skydoor is a supplier where quality is the backbone in the DNA

All products are tested at the factory to reduce assembly time and secure the right functionality

All projects are seen as unique, and the organization will do their utmost to secure quality in everything they do

Skydoor is a flexible partner with high focus on the needs from the customers

## Skydoor Design philosophy

At Skydoor only the best is good enough. We have developed a unique sliding door concept supporting reliability during the use. An elegant design where Danish design traditions goes hand in hand with the function & of course - lowest lifetime cost

# Selected projects and references

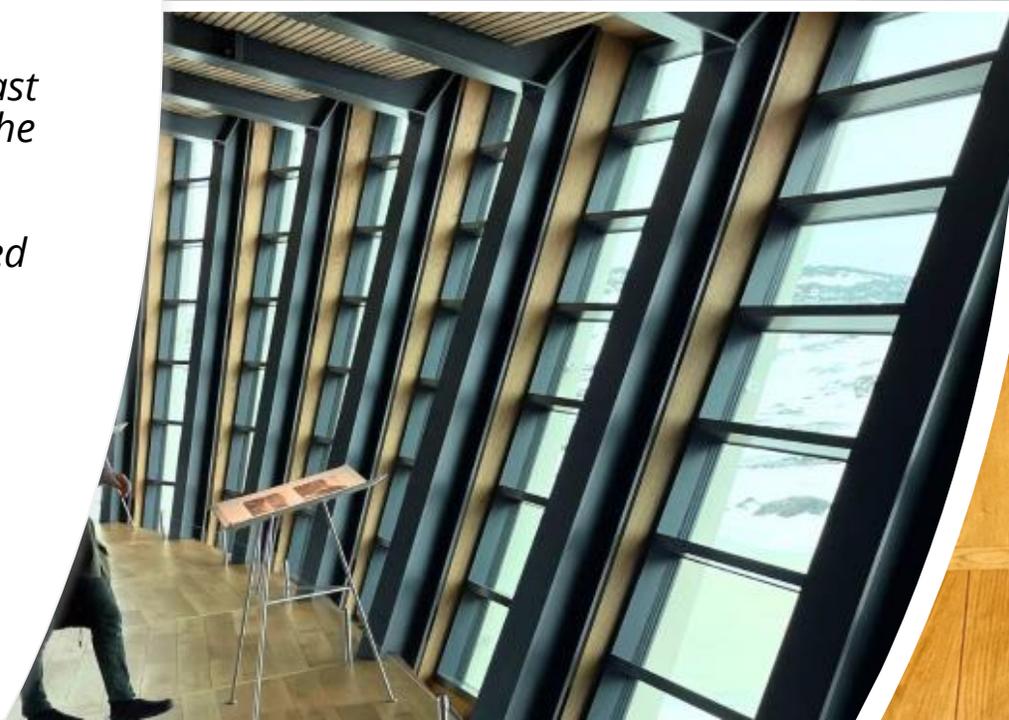

# Selected projects and references

# Isfjordcenter et Ilulissat

The doorframe is made in solid oak with a complimentary doorplate in oak veneer

*"Ilulissat is located in the west coast in Greenland-250 km north of The Polar Circle. The Isfjord is a spectacular place with a unique nature. Isfjordcenteret is designed by the Danish Architect Dorte Mandrup back in 2019. The total area is approx. 1.500 m<sup>2</sup>."*

## Skydoor Innovation\_Lab

At Skydoor an architect or developer have a unique opportunity to design, develop unique sliding door solutions or adjust a standard sliding door to their project  
Challenge Skydoor Innovation\_Lab to realize the dream.

# Skydoor Innovation\_Lab is real

The process from idea to the final product

The door plate is made out of solid floor planks and adjusted the corner to the roof

# Thy Museum.

## Beautiful fire doors in additional height

*"The task was to find a door solution that could compliment the design from the architect. The doors was delivered in black with handles in brass and in a special height of 2,5 meters to create a more open connection between the different display areas of the museum. In addition, the doors designed as a BD30 fire door and a connected to an ADBL surveillance system."*

# NH Hotel Copenhagen.

Skydoor was the supplier for all sliding door for the new 5-star hotel in Copenhagen

*"Skydoor joined a development project together with the architect and the customer. Together we found a very beautiful solution the way we integrated the door in the wall and how the chosen material and the design supported the idea for a modern 5-star hotel in Copenhagen."*

Rigshospitalet & Bispebjerg  
Hospital Copenhagen.

Skydoor has for more than 20  
years delivered sliding doors to  
Rigshospitalet & Bispebjerg,  
Copenhagen

*“Skydoor has the best door on the market,  
Many of the door has managed more  
than 500.000 openings.*

*Very low preventive maintenance. Its very  
easy to replace a damaged doorplate, if  
necessary, due to the patented design.*

*Skydoor product range has a very high  
reliability and fit perfect to a hospital  
environment and Skydoor understand the  
urgency”.*

Henrik Orum  
Bispebjerg Hospital

Skydoor has for more than 35 year delivered sliding doors for hospitals and the eldercare sector in Denmark.

Skydoor can solve all projects inside a hospital or in the eldercare sector. Our products are developed to cope with a tough environment , and Skydoor has solutions for fire, x-ray,soundreductionorautomatic doors, and we have over the years developed a product range if people lifting need to happen throughtheopening of the door or a need to create an additional space to enter a bathroom in a hospital bed etc. mm. All our doors can be maintained fast and easy without damaging the wall to minimize the disturbance of the operation or the patients.
